

ENVIRONMENTAL POLICY

Policy of LTD "SANITARY" in management of the environment is to maintain and improve the quality of the environment and human health.

Environmental activities of the company aims to reduce the amount of pollutants entering the environment during company operations, while ensuring service quality and safety, the desire to create the conditions that ensure the **protection of personnel and the population living in the zone of the enterprise, is achieved by:**

- **Commitment to fulfill all requirements of the Georgian and International legislation to protect the environment from pollution;**
- **Continuous improvement of the environmental management system by setting goals for environmental management programs and objectives;**
- **Monitoring key process characteristics that can have a significant impact on the environment;**
- **Direct management of the environmental aspects of the business and non-emergency situations that may have environmental impacts;**
- **To aim, above all, for the implementation of preventive measures, and not on the corrective actions;**
- **Reduce and minimize the extent of the negative impact on the environment, including air emissions, water bodies and soil, and save natural resources.**

The company's management takes responsibility for the planning of environmental management and analysis, enabling environments, providing enterprise financial, human, material and technical resources necessary to implement this policy.

Environmental policy of "SANITARY" is available to all interested parties and can be provided on demand to the public.

Environmental policy is the basis for the establishment and analysis of the goals in environmental management and objectives.
